

TANZANIA: A PHOTOGRAPHER'S PARADISE

April 2006

Tour Report

In April 2006 Peter Smart, Wild Arena's photographic guide and tour leader, once again accompanied a group on another amazing 17 day safari to northern Tanzania as the huge herds of Wildebeest and Zebra began their long migration through the Serengeti National Park towards Kenya.

A full tour report by Peter will follow and an album showing a selection of photographic highlights may be viewed at:

http://www.petersmartwildlifephotography.co.uk/wa/tour_gallery/tz2006ap/

The *Overview* folder contains a selection of images that have been chosen to show the wide range species and habitat that were seen, and the extensive photographic opportunities that were available. Additional folders contain more of the birds that were seen, and further images of leopard, Cheetah and Lion. All photographs were taken by Peter Smart, mostly using a Canon EOS20D D-SLR with the Canon 70-200mm IS lens with 1.4x extender.
